

Parity

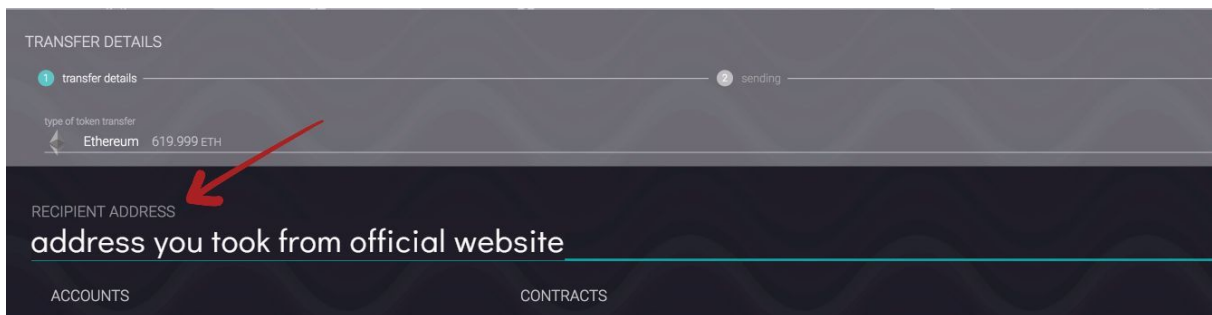

1. Open Parity
2. Go to "Accounts" and select the one, from which you want to transfer your Ether

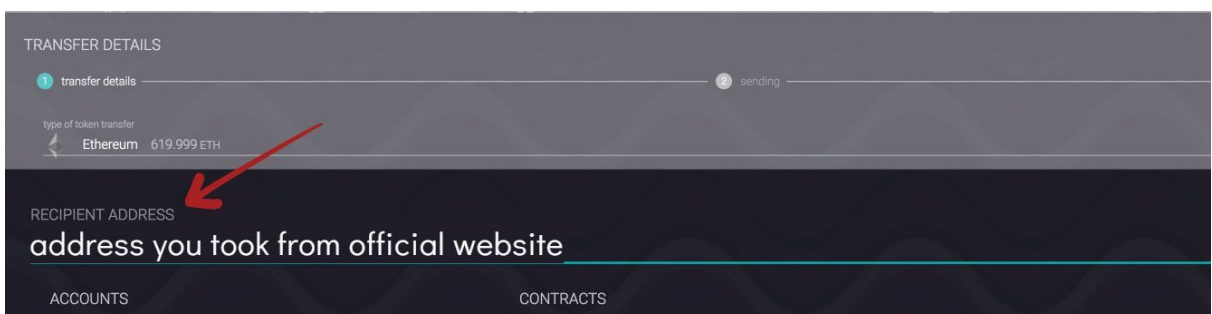

3. Click "Transfer"

4. Just as before, **make sure you use address from official lwtoken.com website**, enter it in "recipient address" field. In "Type of token transfer" should be "Ethereum".

5. Choose the amount of Ether you'd want to send, enable advanced sending options, click "Next",

6. Enter 200000 in "Gas" field, click "Send"

EXTRA INFORMATION

transfer details **extra information** sending

transaction data
the data to pass through with the transaction

Condition where transaction activates

No conditions Send after BlockNumber Send after Date & Time

gas (estimated: 131,508)
200 000

price (current: 20,000,000,000)
20000000000

total transaction amount
0.0063124 ETH

You can choose the gas price based on the distribution of recent included transaction gas prices. The lower the gas price is, the cheaper the transaction will be. The higher the gas price is, the faster it should get mined by the network.

7. Now all you have to do, is confirm the transaction by entering your password

8. Check the details in "Transaction history", if you want to.
